Graphic Arts   Name_____

Word of the Day   **Date**   _____

Rotation_____

JUNIORS

1. Cache _____

2. _____ Sizing an image upward or downward, & letting the software add pixel data (upsampling) or cut pixels data of the image (downsampling).

3. Color Cast _____

4. _____is an imaging method for increasing the size of a digital image by repeating existing data with a mix of faked data to enlarge the image.

5. LAN _____

6 WAN_____

7. Bleed or Bleeding Edge - _____

8. Megabyte _____

9. Bitmap Image (bmp) _____

10. Byte _____

11. Topology _____

12. FTP_____

13. Gigabyte _____

14. Modem_____

15. ISP_____

16. Circuit Board _____

17. Format _____

18. Write Enabled Notch _____

19. Defrag - _____

20. Market _____

21. Target Market _____

22. Firewall _____

23. IP address _____

24. Green Marketing _____

25. **Profit** _____

26. **Invoice** _____

27. **Gross Sales** _____

28. **Gross Profit** _____

29. Browser _____

30. HTML _____

Hardware   modem platform histogram plasma display interpolation Rgb integrity gamut wysiwyg vaporware microcomputer pdf resampling   dpi crt lcd minicomputer *vga* cmyk

31._____Electrical and mechanical parts of a computer

32._____A device that allows computers to communicate via phone lines or cables lines

33._____Operating system that runs programs (Mac, Linux, and Windows)

34._____Illustrates how pixels in image are distributed by graphing number of pixels at color intensity.

35. _____Tube used in TV's & computer monitors to display the output of video signal. Uses RGB.

36. _____Low power display contains a liquid crystal solution between 2 sheets of polarizing material.

37. _____Flat-panel display that works by sandwiching a gas mixture between two sealed glass plates

38. _____Graphics display system for PCs developed by IBM.

39. _____Primary colors when using light   (Additive colors) Ex. monitor

40. _____(Subtractive Colors) Professional Printing

41. _____Full range of color that can be displayed or printed

42. _____The screen is exactly what will appear when printed

43. _____Sarcastic term used for software & hardware that have been advertised but are not yet available.

44. _____Personal computer contains (CPU), a memory system, all housed in a motherboard.

45. _____Midsized computer that is a multiprocessing system capable of supporting 4 to about 200 users.

46. _____Created by Adobe. Document can be viewed even if system lacks the fonts used in the document.

47. _____Imaging method for increasing size of image by repeating existing data w/ a faked data .

48. _____used to describe resolution in monitor & printer. Printing 300dpi & display on monitors 72dpi.

49. _____Sizing image upward or downward, & letting software add pixels or cut pixels data of the image

50. _____ To do the right thing even when no one is looking.
