

# Project 6 Specs

Capture five images using a flash and the flash techniques covered in the lecture vids, text and video links. Students should submit images showing at least one example of each of the following: direct or fill flash and diffused flash. You may also try slow-sync flash, but it is not required. Students may use the built in flash or use off camera flash, if their cameras allow.

**1)** All project images must be submitted in a set labeled Project #6 to your personal Flickr account by the appropriate due date.

**2) Then** upload all project images to our FOTO 1140 class Flickr page for class review. You must post to the class Flickr page to get credit for the project.

Also, please check out the online Flickr galleries for ideas and inspiration.
